

## S2 e-Timesheet™ Version 3.2 System Requirements

Client/Server & Client/Server for SQL Server – For more information Visit [www.sagesoftware.com](http://www.sagesoftware.com)

(Refer to the Supported Platform Matrix for MAS 90 / MAS 200 on Sage Software's Website)

MAS 90 Core, MAS 90 Payroll (Version 3.71) & S2 Project Accounting™ (Version 4.11) must be installed prior to installation of S2 e-Timesheet™. S2 Incorporated **will not be responsible for configuration, IIS Setup, network or other setup costs associated outside the scope of the minimum requirements set by Sage Software & Microsoft**. The minimum requirements for this system are mentioned below and must be in place prior to installation of any of S2 enhancement modules. IIS 5.1 or higher must be completely installed and working before installation of the S2 e-Timesheet™. It is only available for Version 3.71 for MAS 90/MAS 200.

**Operating System Requirements:** Your system must have any one of these 3 operation Systems **Windows 2000 Professional, Windows XP Professional, Windows 2000 Server or higher**. Please contact Microsoft to see if you meet these requirements.

### Minimum Workstation Hardware Requirements

Intel® Processor 1.5 Gig or higher, 512 MB Ram, CD-Rom, 40 G Hard Drive, DSL or Higher Internet connection.

**Recommended Server Software Requirements:** You must have Internet Information Services (IIS 5.1 or higher) on the server for Windows 2000, Windows XP (Professional), Windows Server 2003 or higher. This is a standard requirement set by Microsoft required for using all ASP.NET applications similar to the S2 e-Timesheet™ please contact them for further information on this. [www.microsoft.com](http://www.microsoft.com). Please note that you must have all the latest Microsoft & MS SQL updates prior to installation of the S2 e-Timesheet.

Minimum Server Hardware Requirement		
Scenario	CPU Required	RAM Required
Server	Pentium 2.2 GHz or faster (dual processor)	1 GB or higher
Recommended Server Hardware Requirement		
Server (upto 100 Users)	Pentium 1.3 GHz or faster (dual processor)	1.0 GB or higher
Server (over 100 Users)	Pentium 2.2 GHz or faster (dual processor)	2.0 GB or higher

**Software Requirements:** See below for additional MAS 90 Recommended System Configurations, these recommendations are set forth by Sage Software, please visit [www.sagesoftware.com](http://www.sagesoftware.com) for more information. If you installing the S2 PA or S2 e-Timesheet or both modules then you will be required to install MAS 90/200 version 3.71.

### Minimum System Configuration for MAS 90 Level 3.71 or higher

Recommended	Minimum <sup>1</sup>		Minimum <sup>2</sup>	
	Processor	Memory (RAM)	Processor	Memory (RAM)
Single User/Client Workstation	Pentium 1.1 GHz	258 MB	Pentium 1.0 GHz	256 MB
Windows 2000 Professional	Pentium 1.1 GHz	258 MB	Pentium 1.0 GHz	256 MB
Windows XP Professional Edition	Pentium 1.1 GHz	256 MB	Pentium 1.0 GHz	256 MB
Windows XP Tablet PC Edition	Pentium 1.5 GHz	512 MB	Pentium 1.5 MHz	256 MB

<sup>1</sup> The minimum requirements are for the MAS 90 application only, and are the minimum configurations that will allow the application to run with minimal acceptable performance.

<sup>2</sup> Actual requirements will vary based on your system configuration, additional software installed on the system, network architecture and number of concurrent active sessions.

<sup>3</sup> Windows 98 (all editions) and Windows NT 4.0 (all editions) & Windows XP Home Edition are and will not be supported.

For more information on system requirements for MAS 90 / MAS 200 visit Sage Software at [www.sagesoftware.com](http://www.sagesoftware.com). Please contact us if you would like us to evaluate your system settings, charges may apply. Copyright © 2005
